DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Darmawaskita (U.S. Patent No. 6,184,659).

Referring to claim 1, Darmawaskita teaches a secondary battery control circuit (see Darmawaskita, column 3 lines 25-37), comprising: a liquid detection section for detecting infiltration or generation of a liquid inside a secondary battery or inside a battery pack in which the secondary battery is installed (see Darmawaskita, column 5 lines 52-64); and a control section for interrupting charging/discharging of the secondary battery in a case where a liquid is detected by the liquid section (see Darmawaskita, column 6 lines 14-22).

Referring to claim 2, Darmawaskita teaches a temperature detection section for detecting a temperature of the secondary battery (see Darmawaskita, column 5 lines 52-64), wherein the control section controls charging/discharging of the secondary

battery based on the temperature detected by the temperature detection section (see Darmawaskita, column 6 lines 14-22).

Referring to claim 3, Darmawaskita teaches that the secondary battery control circuit is formed on a single semiconductor chip (see Darmawaskita, column 4 lines 25-30).

Referring to claim 4, Darmawaskita teaches that the single semiconductor chip is enclosed in a sealing section of the secondary battery (see Darmawaskita, column 12 lines 38-56).

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

(a) Iwaizono teaches a secondary battery control circuit.

(b) Sonobe teaches a battery pack.
